Pleated Blinds S

16 мм

BENTHIN®

The Small Pleated Blinds

The innovative 16 mm pleated blind system by Benthin is the perfect solution for privacy protection and sun screens for narrow glazing beads.

In addition to decorative privacy protection, the Small Pleated Blind offers protection against over-heating in summer and excessive cooling in winter.

The Pleated blinds S is ideally suited to both **balcony glazing** and **conservatories**, as well as for **Lift & Slide elements**.

Advantageous grip profile

Convenient operation is ensured by the ergonomically designed grip profile with a width of only 16 mm, permitting the progressive positioning of the hanging.

Free choice of fabric

An assortment of high-quality, functional and decorative fabrics can be put together to your liking.

Pleated blind fabrics with a narrow 15 mm pleat, just like honeycomb fabrics with a narrow width of 20 mm, can be processed.

Easy and fast installation

The Pleated blinds S fits perfectly into the spatial environment, and the direct attachment of the clamping shoe mounting can be flexibly designed.

An adhesive profile attached directly onto the glass pane completes the mounting solutions.

Dimensions

Blind width:
max. 0,80 m (Height max. 2.50 m)
(Outdoor use such as balcony glazing)
max. 1.20 m (Height max. 2.20 m)
max. 1.50 m (Height max. 1.60 m)
